We are your one stop contractor for full circle transportation and processing of your wastes.

Leed Certified Documentation • BIO Mass for
Clean Energy • EPA Approved Facility •
Construction Demolition Disposal • Landscape
Waste Disposal • 75% and Greater Recycle Rate

Midwest Material Management owns and operates a Construction and Demolition recycling facility that diverts materials from landfills. We find reuses for many of the debris materials that businesses generate, avoiding costly landfill and transportations fees. The C&D recycling facility has a state of the art sorting system that was funded in part by the Department of Commerce and Community Affairs.

Our landscape waste transfer station is an **EPA approved** facility. We accept and process all landscape wastes and bulk tree waste regardless of size from stumps, to large wood debris.

We understand the needs of business and we respond to your schedule.
