

Services

Multi-Material Disposal:

- Recyclables
- Landscape Wastes

Refuse Transfer

Established in early 2006, **Midwest Transfer & Logistics** commenced transfer station operations and transfer services. Because of the ever increasing pressure from federal and state regulatory requirements in the full spectrum handling needs of the publically traded solid waste companies.

Midwest Transfer & Logistics operates two transfer stations and provides material disposal and recycling services with its refuse transfer services for eight additional facilities throughout northern Illinois and southern Wisconsin.

Our core expertise involves multi material disposal needs such as recyclables and landscape waste disposals. We provide service to facilities handling up to 2,000 tons per day.

Our fleet includes 2006-2007 Kenworth tractors and our 120 yard Titan tipper trailers. Midwest Transfer & Logistics is capable of moving in excess of 3000 tons of material per day and growing. Let us demonstrate our capability and show you the benefits of working with our outstanding team.

Whatever you need, Midwest Transfer & Logistics is ready to help you build a program that will insure your successful operations. Through efficient, expedited movement and solutions for hard to dispose of materials we are your one stop contractor.
